Message from the Guest Editors

Dear Colleagues,

*Separations* is dedicated to the dissemination of novel methods utilizing separation and extraction technology in mineral processing. This includes the separation and/or extraction of metallic ore, non-metallic ore, oxidized ore, sulfide ore and mining solid waste. Methods involving the theory and technology of gravity, magnetic and flotation separation, chemical reaction extraction engineering, environmental chemical engineering and so on are also of interest. Papers which describe novel theory and its application to practice are welcome, as are those which illustrate the transfer of techniques from other disciplines.

Dr. Guixia Fan

**Message from the Editor-in-Chief**

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
