Message from the Guest Editor

Dear Colleagues,

The analysis of hair steroid hormone, thyroid hormone and endocannabinoid levels is a relatively new strategy to measure long-term cumulative endocrine levels, and is increasingly used in psychoneuroendocrinological research, especially the research of chronic stress.

Hence, a Special Issue of the journal *Separations* is being published, titled "Steroid hormones, Thyroid Hormones, and Endocannabinoids Analysis in Human Hair with LC-MS". This Special Issue will comprise research articles, short communications, and reviews which focus on the development of methods for the analysis of steroids, thyroids, and endocannabinoids in hair based on LC-MS.

Considering your expertise in this field, I invite you to contribute to this Special Issue by submitting an original paper. I look forward to receiving your contribution. Thanks for your consideration.

Dr. Wei Gao

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPlus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2023).
