Message from the Collection Editors

In general terms, “natural products” can be defined as all compounds that are synthesized/produced by living organisms (plants, animals, etc.). The importance of natural products has been recognized for thousands of years, and a considerable fraction of new drugs is still based on the discovery of natural biogenic molecules.

In the Topical Collection “State-of-the-Art in Analysis of Natural Products and Pharmaceuticals”, we welcome original research and review articles on the development and application of analytical methods in both natural product and pharmaceutical science [...].

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [CAPus / SciFinder](#), and [other databases](#).

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 13.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2023).
