

Special Issue

Dispersive Extraction Techniques: New Strategies and Applications

Message from the Guest Editor

The present Special Issue covers the recent advances, strategies, and applications of this type of extraction technique in different fields (e.g., bioclinical, environmental, pharmaceutical, cosmetics, food, etc.), as well as the use of novel (nano)materials and solvents, which offer great opportunities for the development of phases for more efficient and versatile approaches. We hope that this Special Issue will provide an analytical perspective on the current research involved in the field of microextraction. Original articles and review articles by experts are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
