Extraction of Natural Products and Their Bioactivity

Message from the Guest Editor

Natural products derived from plants have been extensively applied in various industries, particularly in pharmaceuticals, cosmetics, and food. The appeal of these natural biomolecules lies in their low rate of side effects compared to that of synthetic compounds, coupled with the modern scientific recognition of the significance of synergistic interactions within natural mixtures. The demand for more functional and better products to meet increasingly stringent consumer requirements has spurred intensive research on bioactive molecules. Consequently, research on extraction and isolation mechanisms has intensified. The objective of this Special Issue, titled "Extraction of Natural Products and Their Bioactivity", is to advance our understanding and foster a deeper appreciation for the recent scientific breakthroughs in the extraction, isolation, and characterization of biologically active compounds derived from natural plants.

- natural products
- extraction
- isolation
- bioactivity
- bioassay-guided fractionation
- bioavailability
- toxicity

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
