

## Special Issue

# Constituent Analysis of Food and Plants

### Message from the Guest Editor

This Special Issue is dedicated to the examination of the constituent analysis of food and plants, with a particular emphasis on, but not limited to, the analysis methods, structural identification, functional activity analysis, virtual screening method, and evaluation methods of significant components found in characteristic foods and beverages. Additionally, we welcome the submission of reviews and comments pertaining to specific component analysis methods and future development trends for potential publication in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
