

Special Issue

Adsorption Process in Chemical Engineering

Message from the Guest Editors

This Special Issue will focus on, but is not limited to, theoretical and experimental advancements and developments related to the process systems engineering of adsorption as follows: the synthesis, characterization, and functionalization of novel multifunctional adsorbents; computer-aided design of adsorbent preparation routes; the modeling of batch and continuous multicomponent adsorption systems; the control and optimization of adsorption processes; the design of intensified adsorption processes; computational tools for adsorption process engineering; the industrial design and scale-up of adsorption-based separations; artificial intelligence-based adsorption applications; life cycle analysis; circular-based production and supply chains of traditional and novel adsorbents; and case studies on the applications of emerging adsorbents in environmental depollution processes, industrial separations, energy storage, carbon dioxide capture, and the recovery of value-added products. The authors are invited to submit original research papers, reviews, and short communications.

Guest Editors

Prof. Dr. Adrian Bonilla-Petriciolet

Prof. Dr. Didilia Ileana Mendoza-Castillo

Prof. Dr. Hilda Elizabeth Reynel-Ávila

Deadline for manuscript submissions

20 August 2025

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
