

## Special Issue

# Application of Biochar to the Removal of Pollutants from Soil and Wastewater

### Message from the Guest Editor

This Special Issue aims to collect contributions on the most recent advances in the field of biochar modification and pollutant removal in water and soil. Topics of interest are the preparation and modification of biochar, the mechanism of pollutant removal by biochar in water or soil, as well as theoretical contributions and simulation studies that elucidate the efficiency of pollutant removal using biochar in water or soil.

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
