10th Anniversary of *Separations*: Recent Advances in Analysis of Energies

Message from the Guest Editor

The constantly growing awareness of greenhouse gas emissions as a result of burning fossil fuels has increased the demand for systems with a high energy density for demanding applications. The separation and analysis of energies is a broad field that covers these approaches. This Special Issue for the 10th anniversary of *Separations* will cover these topics. Review, research, experimental, theoretical, or computational papers are all welcome. All aspects related directly or indirectly to the analysis and separations of energy-related topics are included in the scope of this Special Issue.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
