

Special Issue

Extraction and Characterization of Bioactive Based on Chromatography/Mass Spectrometry

Message from the Guest Editors

Natural sources of bioactive compounds are increasingly sought after by consumers, and the food, pharmaceutical, and cosmetics industries. Natural compounds are most often the compounds responsible for different bioactivities, and for their characterization, it is necessary to resort to extraction and separation techniques that are simple, economical, and environmentally friendly. The study of green technologies is essential in finding effective alternatives that do not compromise consumer safety. The focus of this special edition is to promote research to obtain compounds from natural matrices to develop products with beneficial effects on health and which can be easily adopted by different industries (food, cosmetics and pharmaceuticals) to reach the final consumer.

Guest Editors

Dr. Tania C. S. P. Pires

Dr. Filipa S. Reis

Dr. Custódio Miguel Lobo Roriz

Dr. Manuel Ayuso Vilaboa

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
