# Advance of Separation and Purification Technology in Biotechnology and Biochemistry Macromolecule

### Message from the Guest Editor

Rapid improvements in biotechnology and biochemistry during the last 60 years, both in developing new products and new techniques, have had a significant impact on human life and the environment. To be able to utilize these new products in different applications such as biomedicine and pharmaceuticals, advanced separation techniques must be carried out to achieve a high level of purity. Thus, demands for efficient, economic and fast separation and purification methods for various target molecules have led to the development of new techniques and materials for separation processes. However, we are far from being in an ideal situation! New approaches and methodologies in downstream processing can be achieved by having a clear vision and thinking outside of the box.[...]

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

---

### Editor-in-Chief

Prof. Dr. Frank L. Dorman  
Department of Chemistry, Dartmouth College, Hanover, NH 03755,  
USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
