Emerging Trends in the Protection of Cultural Properties—Novel Control Strategies and Preventive Approaches

Message from the Guest Editors

The durability of the world's cultural heritage depends on many factors, mostly related to the surrounding environment with threats frequently coming from climatic conditions, climate change, air pollution, and biological colonization. Cultural heritage objects support life, and their preservation is at risk of deterioration by living organisms. At present, the importance of biodeterioration processes on historical artworks has attracted a growing amount of attention from the people in charge of their protection. Conservation strategies are mainly devoted to controlling biological development and to preventing its impact. This Special Issue aims to publish outstanding papers on novel advances in products, methods, and techniques for the prevention and control of organisms involved in the biodeterioration of cultural heritage. About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a highquality, open-access journal option with rapid time-topublication without any sacrifice of a rigorous peerreview process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
