

Special Issue

Application of Separations Technologies in Biomedical Analysis

Message from the Guest Editor

This Special Issue invites contributions to the current advances in the development and application of analytical methods for biomedical analysis aimed toward biological fluids or bodily fluids. This liquid class of specimens includes any liquids that can be found within the human body, such as urine, blood, or saliva. Bodily fluids are often extraordinarily complex in nature and mainly consist of salts, proteins, metabolites, and lipids, but they also contain other biomolecules carrying important information about the patient. Separation of these biomolecules prior to any analysis remains one of the most crucial components in today's biomedical analysis and affects the downstream assay performance used to assess at what levels these molecules are present. [...] For further reading, please follow the link to the Special Issue Website at:

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
