

## Special Issue

# Chemical and Biological Technology Applied in Natural Food Products Analysis

### Message from the Guest Editors

Natural food products are increasingly sought by consumers due to their concern for consuming “healthy” products. The selection of these is usually based on the relation between natural products and beneficial health properties, as well as new knowledge regarding the impacts of production on the environment. Therefore, the evaluation of these products is extremely important, aiming to explore their composition, properties, and possible risks to consumers, the scientific community, and industry. There are several chemical and biological analyses which are normally performed to characterize and determine the safety of food products, including molecular, chromatographic, and spectroscopic methodologies. The aim of this Special Issue is to present new advances on different methods of analysis and present new approaches used to evaluate natural food products, contributing to their valorization. Papers which have assessed the in vitro and in vivo safety and efficacy of natural products are especially welcomed for submission.

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
