Special Issue

Analytical Methods for Food Quality and Safety Analysis

Message from the Guest Editor

Nowadays, food analysis is gaining traction as it aims to understand the interactions of food with the environment and their consequences (i.e. large-scale production, organic production, environmental contamination, etc.). It can also provide information on how to improve health by incorporating functional foods, functional ingredients, and/or nutraceuticals into the diet. In this framework, food analysis continuously demands appropriate methods to determine a wide range of compounds with different physico-chemical properties, but these must also provide robustness, high sensitivity, precision, specificity, and speed of analysis. It is my pleasure to invite you to participate in the next Special Issue of *Separations* titled "Analytical Methods for Food Quality and Safety Analysis", which covers the development and application of analytical methods in food analysis for achieving one or several of the abovementioned objectives.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
