Bioactive Compounds in Foods: Separation, Extraction and Application

Message from the Guest Editors

Bioactive compounds can provide health benefits beyond the nutritional value and are originally present or added to food matrices. Foods and food (processing) waste are complex matrices containing an abundance of bioactive components, such as proteins, polysaccharides, lipids, PUFAs, vitamins, probiotics, prebiotics, antioxidants, and pectins. Their separation, extraction and characterization can be a challenge. The aim of this Special Issue is to promote research that adopts processes, including biological ones, that can enhance the separation, extraction and obtainment of bioactive compounds, which enables their application in food, cosmetic and pharmaceutical industries. Membrane technologies that are expected to play an important role in sustainable separation processes, efficient and environmentally friendly extraction methods, as well as applications directly related to gut microbiota and the formulation of symbiotic functional foods, are particularly welcomed.

Guest Editors

Dr. Patroklos Vareltsis

Prof. Dr. Olga Gortzi

Dr. Sotiris I. Patsios

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
