

## Special Issue

# Chromatographic Methods for Environment, Biota and Food Contaminants Analysis

### Message from the Guest Editors

Chromatography is essential for identifying and quantifying various organic pollutants in many complex environmental, biota, or food samples. Some of the challenges currently identified in the use of chromatographic methods for the analysis of environmental, biota, and food contaminants have arisen from the complexity of the matrices analyzed, the lack of standardized analytical procedures dedicated to the new generation of contaminants, the scarcity of knowledge about all potential contaminants, and not least the trace amounts that these new generation pollutants and their by-products might be found in in environmental, biota, or food matrices. This Special Issue aims to deepen our knowledge of chromatographic techniques used for assessing pollution challenges in environmental matrices, biota and food samples, thus inspiring innovative monitoring solutions throughout to contribute to a cleaner and more sustainable global environment based on different chromatographic techniques.

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

---

### Editor-in-Chief

Prof. Dr. Frank L. Dorman  
Department of Chemistry, Dartmouth College, Hanover, NH 03755,  
USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
