Advances in Novel Polymeric Membranes and Membrane Process

Message from the Guest Editors

Polymer-based membranes have advanced or novel functions in the various membrane separation processes for liquid and gaseous mixtures (gas separation, pervaporation, reverse osmosis, nanofiltration, ultrafiltration, microfiltration) and in other important applications of membranes such as water purification, solvent concentration, and recovery. In recent years, advanced membrane technologies, including new membrane materials, membrane preparation technology and membrane processes, have been at the forefront of research. In this Special Issue, the emphasis will be on the polymer structure–membrane property relationships, as well as trends in industrial applications. Contributions on all types of polymeric membrane (gas separation, pervaporation, reverse osmosis, nanofiltration, ultrafiltration, microfiltration) are welcome. Some of the topics include but are not limited to innovative production methods for advanced nanotechnology, advanced membrane materials, novel membrane preparation[...]

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
