

## Special Issue

# Chromatographic Analysis of Biomarkers

### Message from the Guest Editors

Identifying and validating biomarkers that can be used not only for screening/diagnosis but also for surveillance and prognosis are continued scientific challenges in the 21st century. Over the past 30 years, different fields of ‘-omics’ have emerged with the goal of understanding complex biological systems through profiling genes, transcription factors, proteins, lipids, and metabolites. Of relevance, these different analytical approaches have been utilized for biomarker discovery in different sample matrices, including blood, sweat, saliva, urine, and even breath. Different modes of chromatography are critical to provide reliable degrees of sensitivity and, more importantly, selectivity in generating biomarker data. Therefore, this Special Issue is dedicated to publishing research focusing on biomarker analysis and identification through diverse chromatographic methods. This Special Issue aims to encompass a broad range of research, including, but not limited to, novel applications, unique chemometric or biostatistical approaches for data analysis, and analytical method development/validation.

### Guest Editors

Dr. Mark Woollam

Department of Chemistry and Chemical Biology, Indiana University-Purdue University, Indianapolis, IN 46202, USA

Prof. Dr. Mangilal Agarwal

Integrated Nanosystems Development Institute (INDI), Biomedical Engineering and Informatics, Indiana University, Indianapolis, IN, USA

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

---

### Editor-in-Chief

Prof. Dr. Frank L. Dorman  
Department of Chemistry, Dartmouth College, Hanover, NH 03755,  
USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
