

Topical Collection

State of the Art in Separation Science

Message from the Collection Editor

The term “Separation techniques” refers to a group of analytical techniques used to separate the components of a homogenous mixture that are further detected, identified and quantitatively determined. Though separation can involve distillation and evaporation, typically in analytical chemistry, separation techniques include all types of chromatographic and electrophoretic techniques [...] For further reading, please follow the link to the SpecialIssue Website at: https://www.mdpi.com/journal/separations/special_issues/Separation_Science

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
