

Special Issue

Extraction and Separation of Bioactive Molecules from Marine Flora and Fauna and By-Products of Aquatic Industries

Message from the Guest Editors

Marine flora and fauna constitute a vast source of potentially bioactive molecules, including microalgae, seaweeds, fisheries and by-products of aquatic industries, among others. In particular, the valorization of by-products to produce value-added compounds is considered pivotal for sustainable growth based on a circular economy. For this Special issue, we invite front-line researchers and authors to submit original research and review articles focused on the “**Extraction and Separation of Bioactive Molecules from Marine Flora and Fauna and By-Products of Aquatic Industries**”, addressing, among others, principles, factors, and parameters affecting the extraction process, most recent applications for the extraction of valuable compounds from several marine sources, new technical and industrial challenges, economic viability and sustainability on different markets, perspectives about the potential applications of the marine bioactive extracts in the food, pharmaceutical and cosmetic industry, experiments and modeling, new potential raw materials and residues, fractionation and purification processes.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
