

Special Issue

Separation Process through Adsorption for Sustainable Utilization of Bioresources

Message from the Guest Editor

We invite authors to submit papers on recent advances and results in the recovery of bio-resources using adsorption separation. Topics include, but are not limited to: the adsorption separation of previously unutilized/underutilized bio-resources, the development of adsorbents that are suitable for utilization as bio-resources, adsorption separation processes for applied bio-resources and materials, and methods for laboratory-based and practical analyses of adsorption processes of biological materials.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
