

Special Issue

Extraction and Analysis of Biologically Active Substances in Food and Beverages

Message from the Guest Editor

The aim of the Special Issue is to present a collection of studies dealing with different food commodities and their analysis conducted under different conditions, for example, different storage types and periods and after application of different technological steps.

Submissions of manuscripts dealing with the analysis of bioactive compounds in different food commodities and their interactions in complex food matrices are of interest and will be considered for publication. More specifically, the scope of the Special Issue includes studies focusing on the following issues: a. Extraction techniques with different edible matrices b. Quantitative analysis applied on edible matrices c. Analysis comparison between results gained by different methodologies d. Food and beverage qualitative and quantitative analysis

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
