

Special Issue

Metabolomic Analysis with Chromatography

Message from the Guest Editor

The widespread applicability of chromatography to metabolomic analysis has been observed in the last decade. The high interest and increased use of rapid, sensitive, and selective analysis of metabolites, produced or transformed by a *living organism*, in a variety of matrices, have led to innovation in chromatographic separation in this field. This Special Issue aims to present the most recent applications of all types of chromatographic separations to metabolomics in life and pharmaceutical sciences. Both fundamental and applied works are equally welcome. Dr. Angela I. Calderon

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
