Special Issue

Development and Application of Novel Membrane Materials and Membrane Processes

Message from the Guest Editor

Green, environmentally friendly membrane technology with high efficiency and low energy consumption and other unique advantages is widely used in water desalination, oil-water separation, gas purification, bionics, and a variety of other fields. In the last several decades, membranes with specific functions have continuously emerged, introducing new vitality into the research of membrane separation technology. This Special Issue aims to collect contributions on the most recent advances in the field of membrane materials and processes which focus on water treatment. Topics of interest are novel membrane materials and processes, such as oil-water separation membranes, water desalination, wastewater treatment, antifouling membranes, freshwater membranes, and so on. Other topics related to water treatment membrane materials and processes are also welcome. It is my pleasure to invite you to submit a manuscript for this Special Issue. Papers on the current development and application of novel membrane materials and processes are welcome.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
