

Special Issue

Women in Separations

Message from the Guest Editors

Beyond any doubt, separation techniques play a dominant role in all scientific and routine analysis laboratories. Among them, the use of instrumental chromatographic techniques enables fast and reproducible analytical results to be obtained. Chromatographic techniques are widely used for the elucidation of components in various fields, such as in food analysis, biological studies, pharmaceutical analysis, forensics, toxicology, environmental analysis, archaeology, etc. Separation mechanisms are militarized to cover all analytical requirements. In parallel with the outstanding role of separation techniques in a variety of scientific fields, we would particularly like to highlight the impact of female researchers in the field of chromatographic separations in this Special Issue, to serve as motivation for females pursuing a STEM career. Hence, we would like to invite well-established scientists to share the results of their research with the scientific community, through this Special Issue, with the aim to compile manuscripts written or lead by women.

Guest Editors

Prof. Dr. Victoria Samanidou

Dr. Natasa Kalogiouri

Dr. Maria Touraki

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
