

Special Issue

Separations in Biomedical Analysis

Message from the Guest Editor

Separation methodologies are essential to biomedical sciences. Biomedical analysis covers a fairly broad field from the characterization of drugs to the monitoring of active substances and related metabolites in biological fluids. The field is booming with the emergence of innovative separation methods focusing on new separation methods/supports and/or new methods of sample processing. The target of this Special Issue is to present the state-of-the-art and the development of innovative separation methods for biomedical analysis in various fields, such as quality control, biochemistry, medical chemistry biotechnology, molecular biology, cell biology, and related disciplines.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
