Message from the Guest Editors

Dear Colleagues,

Historically, as the concept of Smart Cities unfolded and gained traction globally, ICT corporations pushed for the adoption of off-the-shelf solutions. While this was initially seen as innovative, off-the-shelf solutions are no longer accepted as they often overlook the basic tenets of the Smart Cities concept. In reality, most off-the-shelf solutions fail to acknowledge issues like the decision-making processes of different cities, their regulatory landscapes and the basic problems and challenges that need to be solved across jurisdictions and communities. As a result, ICT corporations are accused of shifting attention from the big and important questions of the Smart Cities concept and its implementation to minute issues with little impact on cities but the ability to increase profit margins.

As such, we welcome submissions that revisit, critique, challenge, and contribute to the Smart Cities concept, with the aim of highlighting new and different viewpoints that re-align efforts by ICT corporations to deliver better and more cohesive and inclusive Smart City solutions.

Message from the Editor-in-Chief

Smart Cities provides an advanced forum for the dissemination of information on the science and technology of smart cities. It publishes reviews, regular research papers (articles) and communications in all areas of research concerning smart cities. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers so that the full experimental results can be reproduced. Manuscripts regarding research proposals and research ideas are particularly welcome.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Urban Studies)
