

## Topical Collection

# Smart Governance and Policy

### Message from the Collection Editors

The digital revolution has transformed how governments in smart cities operate and interact with their citizens. Implementing smart governance is challenging due to bureaucratic inertia, a resistance to change, and the demands for new competencies and resources. Therefore, a thorough investigation of the evolution of organizational structures, leadership dynamics, fiscal management, human resource management, and measurement and evaluation frameworks is crucial to deepen our understanding. This Special Issue highlights the development of theoretical frameworks and relevant case studies in smart governance and policy capacity building. This Special Issue seeks to present analytical, descriptive, and explanatory research that broadens the strategic and operational practices for smart governance development. It aims to bridge the existing knowledge and practice gaps in the multidisciplinary area of smart cities, focusing on policy initiatives, case studies, empirical research, and new perspectives that apply innovative and sustainable strategies for advancing smart cities across national, comparative, and international contexts.

## About the Journal

### Message from the Editor-in-Chief

As urban environments continue to evolve, Smart Cities serves as a key platform for sharing innovative research that addresses the complexities of modern urban life. Our journal provides a space for interdisciplinary dialogue and knowledge exchange on the latest advancements in smart city technologies and practices. We prioritize research that not only pushes the boundaries of scientific understanding but also has practical implications for improving urban living, sustainability, and governance.

We welcome contributions from diverse fields that bring fresh perspectives to urban challenges, from smart infrastructure and IoT integration to data-driven decision-making and sustainable development. Through a combination of rigorous peer-review and rapid publication, we aim to disseminate impactful research that fosters the development of smarter, more resilient cities.
