

Special Issue

Smart City Related Policies and Implementation

Message from the Guest Editors

Practices on policies relating to smart city development have accumulated a vast amount of knowledge in STEEP (social, technical, economic, environmental and political) areas in the past three decades. This body of knowledge is valuable to inform research and practices with long-term effects. Through learning from many cases about the efficacy of policies at various levels in smart city development around the world, the necessity is shown for both technical reviews and theoretical studies to focus on smart-city-related policies and implementation, as well as to support evidence-based theory development and practices in related areas in the future. The purpose of this Special Issue is to show the latest research in policy-related areas in the context of smart cities.

About the Journal

Message from the Editor-in-Chief

As urban environments continue to evolve, Smart Cities serves as a key platform for sharing innovative research that addresses the complexities of modern urban life. Our journal provides a space for interdisciplinary dialogue and knowledge exchange on the latest advancements in smart city technologies and practices. We prioritize research that not only pushes the boundaries of scientific understanding but also has practical implications for improving urban living, sustainability, and governance. We welcome contributions from diverse fields that bring fresh perspectives to urban challenges, from smart infrastructure and IoT integration to data-driven decision-making and sustainable development. Through a combination of rigorous peer-review and rapid publication, we aim to disseminate impactful research that fosters the development of smarter, more resilient cities.

Editor-in-Chief

Prof. Dr. Pierluigi Siano
Department of Management and Innovation Systems, University of
Salerno, 84084 Salerno, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Urban Studies) / CiteScore - Q1 (Urban Studies)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.8 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2025).
