

## Special Issue

# Family/Household Well-Being and Individual Development

### Message from the Guest Editors

The family is the basic unit of society. It is primarily responsible for teaching and modelling health and creating wellness-promoting settings and practices. Investments in research on family well-being and individual development are vital to our communities and our children's health and development.

There are several facets of family well-being. This Special Issue calls for research that advances and fills the gaps in our understanding of family well-being and individual development, providing meaningful insights for research, practice, and policy.

Families are complex, with various definitions and configurations. This Special Issue uses a broad definition of the family that includes not only "a group of two people or more (one of whom is the householder) related by birth, marriage, or adoption and residing together," but also households comprised of relationships and interactions with biological and/or non-biological relatives.

Topics may include any of the following:

1. Social determinants of family/household well-being, resilience, and self-efficacy
2. Measurements of family/household well-being
3. Family-centered policies and services
4. Family-centered public health and healthcare

## About the Journal

### Message from the Editor-in-Chief

*Societies* (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
