

## Special Issue

# Digital Society in the Making: Technological Innovation, Social Change and Education

### Message from the Guest Editors

Digital technologies are transforming contemporary societies worldwide, reshaping social relationships, institutional structures, cultural practices, and forms of governance. The digital society is a dynamic and evolving process characterized by technological innovation, social interaction, and human diversity, resulting in heterogeneous outcomes. This Special Issue, "Digital Society in the Making: Technological Innovation, Social Change, and Education," aims to provide a critical and interdisciplinary analysis of the interplay between technological innovation and processes of social change, highlighting emerging opportunities and challenges.

The Special Issue focuses on the reciprocal relationship between digital technology and social transformation, emphasizing how educational, social, cultural, political, and economic contexts mutually influence their development. Special attention is given to educational processes, digital literacy, and the role of learning environments in shaping digital societies. Contributions that transcend techno-deterministic approaches are encouraged, analyzing the co-construction of technology and society with critical and analytical rigor.

## About the Journal

### Message from the Editor-in-Chief

*Societies* (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
