

Special Issue

Artificial Intelligence for People with Disabilities

Message from the Guest Editor

We would like to invite you to submit your research article or a comprehensive review for consideration and publication in the Special Issue “Artificial Intelligence for People with Disabilities” published by *Societies* (ISSN 2075-4698). Since Alan Turing first posed the question of whether machines can think in 1950, the artificial intelligence (AI) landscape has evolved significantly. Without a doubt, AI is transforming societies and economies. It holds huge promise in addressing global health crises and improving well-being. This Special Issue will cover state-of-the-art research in artificial intelligence focused on people with disabilities, especially on long-term neurological conditions, with the main aim to expand our knowledge of the social realm. Topics may include, but are not limited to, the following:

- Oversight of AI applications
- AI in cognitive and motor impairments of long-term neurological conditions
- Complex interplay between technology, rehabilitation and societies
- Intersection of inclusion and privacy of people with disabilities in artificial intelligence

About the Journal

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

Editor-in-Chief

Prof. Dr. Gregor Wolbring

Community Rehabilitation and Disability Studies, Cumming School of
Medicine, University of Calgary, Calgary, AB T2N 4N1, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), RePEc, EconBiz, and other databases.

Journal Rank:

JCR - Q2 (Sociology) / CiteScore - Q2 (General Social Sciences)
