Reshaping Social Reality: Digital Societies and the Data- Based Approach

Message from the Guest Editors

Digital technologies and data-driven approaches are reshaping the landscape of modern societies. From social interactions to policy-making, the influence of big data and algorithmic decision-making has penetrated nearly all facets of human life. This special issue, *Reshaping Social Reality: Digital Societies and the Data-Based Approach*, explores the deep changes in social structures, behaviours, and realities brought about by the emergence of the so-called digital age. The purpose of this issue is to critically examine how Data-Based methodologies and digital technologies are transforming traditional social science domains such as sociology, social statistics, anthropology, social psychology, economy, marketing, organization, history, philosophy, social engineering, STS studies, and related disciplines. By engaging with both theoretical and empirical work, this issue will explore the consequences of data-driven technologies on social research, governance, public discourse, and everyday life. We welcome contributions that address the opportunities, challenges, and biases that accompany the rise of digital societies from a social science perspective.

About the Journal

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.

Editor-in-Chief

Prof. Dr. Gregor Wolbring

Community Rehabilitation and Disability Studies, Cumming School of
Medicine, University of Calgary, Calgary, AB T2N 4N1, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
