Youth Health and Well-Being: Determinative Effects of Environment

Message from the Guest Editor

Young people are not only the most affected by the crises facing our society but are also the next generation with the opportunity to build a better, more just society. At this crucial stage in their life course, youth acquire knowledge and skills, gain experience in social interactions, and develop habits and lifestyles that promote or compromise health – all within the context of a complex environment of interwoven personal, family, community, and systems factors. As young people transition from youth to adulthood, the most important factors affecting a successful transition are rooted in their current health and wellbeing, including the impact of their social, cultural, and physical environments. This Special Issue of *Societies* invites researchers to submit their original research articles, reviews, and conceptual papers on the determinative effects of environment on youth health and wellbeing. This issue seeks to present the most up-to-date scholarly work that unfolds and examines the mechanisms underlying the determinants of youth health and wellbeing across the spectrum of microsystems to macrosystems.

About the Journal

Message from the Editor-in-Chief

Societies (ISSN 2075-4698) is an interdisciplinary journal that brings together different scientific approaches to engage with societal questions to enhance our understanding of the social realm throughout history. The journal publishes original empirical research papers, literature reviews, and conceptual papers. Our aim is to publish papers that have a significant impact on addressing present and emerging societal questions. Therefore, we encourage researchers to publish their results in as much detail as possible. For empirical research papers and literature reviews, all experimental details must be provided, so that the results are reproducible. We also encourage the publication of timely theoretical pieces on topics of interest to existing and emerging societal questions. Papers are either published in the open journal or in Special Issues devoted to specific topics of interest to the field.
