Message from the Guest Editors

Dear Colleagues,

Industrial clusters represent an important driver of growth and innovation in both developed and transition economies, where their study continues to attract the interest of the scientific community. As a result, multiple recent investigations are identified from different disciplines or approaches. As can be seen, the advantages derived from co-localization are constantly being refined with contributions aimed at deepening the study of the structural heterogeneity of cluster firms, the analysis of social networks, the access to global value chains, or the evolutionary trajectory of the cluster and its resilience capacity to manage new challenges and changes.

In short, and in spite of the fact that its relevance in certain academic forums is sometimes questioned, the analysis of the micro-mechanisms that underlie these productive systems anchored to the territory continues to represent a subject of interest in the literature.

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*General/Social Sciences*)
