

Special Issue

Disinformation in the Age of Artificial Intelligence

Message from the Guest Editors

Artificial intelligence (AI) has arrived in society, taking center stage as a high technology. Its impact affects all social sectors and virtually all processes carried out by people and all social actors. This Special Issue seeks to offer a comprehensive understanding of the impact of AI on disinformation, integrating interdisciplinary work from fields such as communication, journalism, political science, sociology, economics, law, and engineering. The aim is to bring together a set of contributions that address the main challenges facing today's societies, which, in turn, pose renewed challenges for research in the social sciences. It is necessary to understand in detail how current AI tools are being used, the ethical challenges for different professions, their impact on society and citizens' perceptions, as well as their economic impact and impact on social transformations.

Guest Editors

Prof. Dr. Xosé López García

Dr. Hermenegildo José Casas García

Dr. Alba Silva-Rodríguez

About the Journal

Message from the Editor-in-Chief

Social Sciences is an international open access peer-reviewed journal publishing the latest research across all disciplines of the social sciences including anthropology, criminology, economics, education, geography, history, law, linguistics, political science, psychology, social policy, social work, sociology and related areas. The journal is especially interested in interdisciplinary research, and aims to facilitate the interaction and communication between different social scientific disciplines. The journal welcomes conventional length articles as well as shorter Research Notes or short articles, as long as they meet the journal's standards of quality and originality.

Editor-in-Chief

Emeritus Prof. Nigel Parton

School of Human and Health Sciences, University of Huddersfield,
Huddersfield HD1 3DH, UK
