Achieving Sustainability through Educational Advances: Deep Dives into Social, Economic, and Environmental Perspectives

Message from the Guest Editors

Sustainable development comprises three fundamental dimensions—social, economic, and environmental—that are essential for harmonious coexistence in modern society. Education, with its broad spectrum of specialties and approaches, plays a pivotal role in this realm, not only mirroring these dimensions but also acting as a catalyst for their integration and advancement. This Special Issue will explore how various educational specialties specifically address each of these dimensions, both individually and collectively. The social dimension focuses on human well-being, equity, and inclusion; the economic dimension emphasizes prosperity and financial viability; and the environmental dimension centers on the preservation and sustainable management of our natural resources. Contributions from diverse educational specialties that delve deeply into a single dimension, offering a detailed and specialized view, are of particular interest.
