

Special Issue

Ethics of Climate Security and Disaster Planning

Message from the Guest Editor

This Special Issue of *Social Sciences* aims to bring together research from across the social sciences to address central challenges of ethics, justice and fairness in disaster risk reduction and climate change adaptation efforts. The analysis of how risks and responsibilities should be distributed informs wider discussions about how risk governance can be transformed according to normative ideals, how existing forms of governance compare, and how responsibility for financing should be shared to achieve equity, efficiency and additionality.

About the Journal

Message from the Editor-in-Chief

Social Sciences is an international, open access, peer-reviewed journal publishing the latest research across all disciplines of the social sciences, including anthropology, economics, law, linguistics, education, geography, history, political science, psychology, sociology, and other related areas. The journal is especially interested in interdisciplinary research, and aims to encourage creative, innovative, and critical reflections across social science disciplines. The journal welcomes conventional length articles, shorter Research Notes or articles, as well as Special Issue submissions, as long as they meet the journal's standards of quality and originality.
