Precarity Generators: Borders, Bordering Processes, and the Creation of Precarious Crossings

Message from the Guest Editor

Borders are more than mere physical boundaries, they are engines in the creation of precarity. As people cross into the borderlands between nations, they are crossing into spaces of precarity, where their identities and rights to movement, and to request aid or refuge can be challenged, restricted, or rejected altogether. While there has been a great deal of research and policy produced in recent years around issues of regulating border crossings, there has been comparatively less work done on understanding the role of bordering processes in the creation and reproduction of precarity. This Special Issue will facilitate such a discussion and will add to the body of research examining the experiences of irregular and precarious border crossers.
