Special Issue

Women's Special Issue Series: Software

Message from the Guest Editors

Margaret Hamilton, an American computer scientist, coined the term "Software Engineering" in the 1960s, leading the development of flight software for NASA's Apollo program, Despite her foundational work, only 5.17% of software developers today are women, and the profession remains male-dominated. Intersectionality, a framework to understand overlapping identities and systemic inequalities, is instrumental in examining gender disparities within software engineering (SE). Studies indicate that gender-diverse teams experience fewer challenges and improved productivity. In opensource software (OSS), research highlights gender barriers and under-representation, which impact participation and quality. Further, biases in SE, perpetuated by unconscious stereotyping in education and workplace settings, contribute to the gender imbalance, limiting opportunities for women. This Special Issue focuses on the intersection of gender diversity and SE, featuring contributions about interventions, about how to measure and address gender biases within SE, as well as about female role models in software architecture, AI, and cybersecurity.

Editor-in-Chief

Prof. Dr. Mirko Viroli

Department of Computer Science and Engineering, Alma Mater Studiorum Università di Bologna, via dell'Università 50, 47521 Cesena FC, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.9 days after submission; acceptance to publication is undertaken in 4.2 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
