

Special Issue

The Future of Model-Driven Software Engineering

Message from the Guest Editors

Model-driven engineering is a discipline that aims at abstracting and automating software development activities that support programmers through the entire development lifecycle. Nowadays, model-driven software systems have become common, and in addition, the application of machine learning (ML) algorithms within MDE has experienced moderate growth and is now rapidly increasing. At the same time, due to the complexity of AI systems, MDE techniques have been successfully applied to assist in the design of AI artifacts and systems. Potential topics for this Special Issue include, but are not limited to, the following:

- model-driven engineering
- machine learning
- artificial intelligence
- MDE tools
- modeling

For more information, please check [here](#).

Guest Editors

Dr. Silvia Bonfanti

Department of Management, Information and Production Engineering,
University of Bergamo, Bergamo, Italy

Dr. Juri Di Rocco

Department of Information Engineering, Computer Science and
Mathematics, University of L'Aquila, L'Aquila, Italy

Deadline for manuscript submissions

closed (28 February 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mirko Viroli

Department of Computer Science and Engineering, Alma Mater
Studiorum Università di Bologna, via dell'Università 50, 47521 Cesena
FC, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 28.9 days after
submission; acceptance to publication is undertaken in 4.2
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and
reviewer names published annually in the journal.
