

Special Issue

Software Analysis, Evolution, Maintenance and Visualization

Message from the Guest Editor

Topics of interest include, but are not limited to, the following:

- Methods to monitor the evolution of the quality of software elements (i.e., classes, packages and modules), taking into account the use of software quality metrics.
- Mechanisms for the measurement and analysis of task execution, progress analysis and performance prediction.
- Methods to assist in risk management and to control the size and complexity of the software product.
- Instruments to keep project managers informed on collaboration patterns between developers.
- Approaches to study synchronous and asynchronous changes, as well as their implications (in terms of quality and functionality).
- Methods to understand and comprehend software systems and their recent changes and evolution.
- Comprehension of the sociotechnical relationships derived from the development process.
- Software tools for software analysis, evolution and maintenance.
- Software analysis, parsing and fact extraction.
- Software evolution analysis.
- Mining software repositories, software analytics and software visualization.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Mirko Viroli

Department of Computer Science and Engineering, Alma Mater
Studiorum Università di Bologna, via dell'Università 50, 47521 Cesena
FC, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.9 days after submission; acceptance to publication is undertaken in 4.2 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
