

Special Issue

Advanced Techniques for Software-Defined Networking

Message from the Guest Editor

This Special Issue aims to explore the potential of advanced techniques for enhancing the capabilities of SDN in various domains, including cloud computing, edge computing, beyond 5G, and the internet of things (IoT). In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Machine learning for traffic engineering and network optimization in SDN;
- Blockchain-based solutions for enhancing security and privacy in SDN;
- Data mining techniques for network analytics and management in SDN;
- SDN-based solutions for managing and securing IoT networks;
- SDN for edge computing and its applications in beyond 5G networks.

Authors are invited to submit original research articles, case studies, and review articles that address the topics of interest mentioned above. All submissions will be peer-reviewed, and acceptance will be based on the originality, significance, and quality of the work.

Studiorum Università di Bologna, via dell'Università 50, 47521 Cesena
FC, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.9 days after submission; acceptance to publication is undertaken in 4.2 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
