

Special Issue

Advances in the Prediction and Remediation of Soil Salinization

Message from the Guest Editors

With this Special Issue on 'Advances in the Prediction and Remediation of Soil Salinization', we are inviting researchers to submit their views and research findings on this topic. The intent of this Special Issue is to collect and gather the broad knowledge which exists globally on this theme and is still intensively researched. With this Special Issue on 'Advances in the Prediction and Remediation of Soil Salinization', we are inviting researchers to submit their views and research findings on this topic. The intent of this Special Issue is to collect and gather the broad knowledge which exists globally on this theme and is still intensively researched.

The objective of this Special Issue is to collate knowledge on the topic of soil salinity, which presents novel approaches in predicting the risk of salinity to occur and ways to remediate salinity, whether in natural environments, in agriculture or rebuilt landforms such as in mining. The demand on soils will only intensify, and soil salinity will be one of the major risks which we and future generations need to control and manage.

Guest Editors

Prof. Dr. Thomas Baumgartl

Future Regions Research Centre, Geotechnical and Hydrogeological Engineering Research Group, Federation University, Gippsland, VIC 3841, Australia

Dr. Mandana Shaygan

Centre for Water in the Minerals Industry, The University of Queensland, Brisbane, QLD 4072, Australia

Deadline for manuscript submissions

closed (30 June 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Heike Knicker

Group of Interactions between Soils, Plants and Microorganisms,
Department of Food Biotechnology, Instituto de la Grasa (IG-CSIC),
41012 Sevilla, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), AGRIS,
PubAg, GeoRef, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Soil Science) / CiteScore - Q1 (Earth-Surface
Processes)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 31.6 days after
submission; acceptance to publication is undertaken in 4.6
days (median values for papers published in this journal in
the first half of 2025).
