Message from the Guest Editors

Dear Colleagues,

Solids has made significant progress in its several-decades-long existence as a scientific field. The need for the field has never been more clear than it is today. Many European research groups are working on solid-state sciences.

This Special Issue is dedicated to the new achievements from European laboratories in research areas of all areas of solid-state sciences, including theoretical, fundamental, and applied research topics. Original research articles, reviews, or communications within the scope of *Solids* and from researchers based at any European university or scientific institution are welcome.

Prof. Dr. Mirosław Mączka
