# Special Issue

# Pathways to Healthy Outcomes: Physical Literacy and Training for Adolescents

# Message from the Guest Editor

Promoting lifelong health begins with the development of physical literacy during childhood and adolescence, an essential foundation for sustained wellbeing. Physical literacy involves not only engaging in sports but also cultivating the knowledge, confidence, and motivation necessary for continuous participation in physical activities. This developmental phase is crucial for forming habits that yield healthy outcomes, including reduced risk of chronic diseases and enhanced mental wellbeing.

Training programs targeting adolescents aim to develop fundamental movement skills, which serve as the groundwork for more complex activities and sports.

Educators and coaches are integral to this process, tasked with fostering supportive and inclusive environments. Their role involves promoting understanding of the benefits of physical activity and reinforcing adolescents' confidence and motivation through positive reinforcement. By prioritising physical literacy, we equip adolescents with the skills needed for healthier futures, ensuring they lead active lives and make informed choices concerning their wellbeing.

# Message from the Editor-in-Chief

Sports (ISSN 2075-4663) is a peer-reviewed scientific journal that publishes original articles, critical reviews, research notes and short communications in the interdisciplinary area of sport sciences and public health. It links several scientific disciplines in an integrated fashion, to address critical issues related to sport science and public health. The journal presents diverse original articles, including systematic and narrative reviews, cohort and case control studies, innovative randomized trials, and formative research using qualitative and quantitative methods with the aim to provide information for researchers to plan intervention programs. It addresses diverse public health, physical activity and exercise science topics.

### Editor-in-Chief

# Prof. Dr. Eling Douwe De Bruin

- 1. Institute of Human Movement Sciences and Sport, IBWS ETH, HCP H 25.1, Leopold-Ruzicka-Weg 4, CH-8093 Zürich, Switzerland
- 2. Karolinska Institutet, Stockholm, Sweden

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Sport Sciences) / CiteScore - Q2 (Physical Therapy, Sports Therapy and Rehabilitation)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2025).
