Advances in Probability Theory and Statistics

Message from the Guest Editor

Various advances and developments based upon probability theory and statistics are becoming increasingly important in the modeling and analysis of many problems in the mathematical and statistical sciences, as well as in other areas of applied sciences. As the of this Special Issue, I cordially invite and welcome your review, expository, and original research articles addressing the recent potentially useful advances and developments in probability theory, statistics and related areas. I look forward to receiving your valuable contributions to this Special Issue.
