

Special Issue

Statistics, Analytics, and Inferences for Discrete Data

Message from the Guest Editor

This Special Issue calls for research papers devoted to the development of theories, methods, and applications for discrete data analysis. In particular, the authors are encouraged to develop the following:

- New analytic tools including measures, statistics, and visualization methods;
- New descriptive and predictive models as well as their assessment and diagnostics;
- Novel applications of existing methods to emerging problems in subject domains and industries;
- Reviews of current statistical practice in subject domains and industries with in-depth discussions on its limitations and pitfalls.
