

## Special Issue

# Statistics, Analytics, and Inferences for Discrete Data

### Message from the Guest Editor

This Special Issue calls for research papers devoted to the development of theories, methods, and applications for discrete data analysis. In particular, the authors are encouraged to develop the following:

- New analytic tools including measures, statistics, and visualization methods;
- New descriptive and predictive models as well as their assessment and diagnostics;
- Novel applications of existing methods to emerging problems in subject domains and industries;
- Reviews of current statistical practice in subject domains and industries with in-depth discussions on its limitations and pitfalls.

### Author Benefits

#### High Visibility:

indexed within ESCI (Web of Science), Scopus, RePEc, and  
other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 22.3 days after  
submission; acceptance to publication is undertaken in 3.8  
days (median values for papers published in this journal in  
the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review  
reports receive vouchers entitling them to a discount on  
the APC of their next publication in any MDPI journal, in  
appreciation of the work done.
